

HL TECHNOLOGY

Simply the Best!

- Proven non-stick system with a noble surface, now also available in DURIT® High Level Technology
- No ceramic reinforcement in the top coat thanks to the newly developed polymer matrix
- Much better non-stick effect compared to conventional three-layer systems
- The HL technology guarantees best results in the LGA / TÜV abrasion test at a layer thickness of 35-40 µm
- Also suitable for use in the „top level cookware“ area

Much better non-stick effect

compared to conventional systems

Abrasion results according LGA-/TÜV-test

Milk is sticking

Easy release

Cleaning with water jet only

Much better long lasting non-stick effect after pancake & milk test!
