

ENTRY LEVEL

CORFLON® Ultra

ENTRY LEVEL products are our starting range solutions. They are characterized by a good performance in daily, simple use.

- Versatile system for simple, daily use
- Resistant top coat
- Good scratch and abrasion resistance
- Good non-stick effect

ENTRY LEVEL

CORFLON® Ultra

CORFLON® Ultra – our starting product with good performance

Improved corrosion resistance and good non-stick properties.
Developed for normal use of cookware.

Characteristics	
Quality level for consumers	★
Basis	PTFE
Number of layers	2
Coating thickness µm [mils]	20 - 25 [0.79 - 0.98]
Curing temperature °C [°F]	420 [788]
Service temperature °C [°F]	250 [482]
Color variety	various color options feasible

Performance profile	
Scratch resistance	★★
Abrasion (BS)	★★
Non-stick (LGA)	★★
Non-stick (LGA & milk)	★★
Corrosion resistance	★★

Substrate	
Pressed / forged alu	✓✓
Cast alu	✓
Stainless steel	-

CORFLON® Ultra is a universal, two-coat water-based non-stick system. Due to being fit-for-purpose and having a good non-stick effect, this system is well suited for daily, simple use.

- ① Robust top coat for a long-lasting non-stick effect
- ② Primer with very good adhesion to the substrate
- ③ Specially prepared substrate for an optimum adhesion of the coating to the cookware product

ENTRY LEVEL COATINGS

 ILAG coatings applied in the right way can be used for food contact materials according to the European legislation.
