

ENTRY LEVEL

DURIT[®] Select Pro

ENTRY LEVEL products are our starting range solutions. They are characterized by a good performance in daily, simple use.

- Versatile system for daily use
- Highly resistant top coat
- Good scratch and abrasion resistance
- Very good non-stick effect

ENTRY LEVEL

DURIT® Select Pro

DURIT® Select Pro – our model with very good lifetime

High resistance and very good non-stick features make this system unique.
For daily use.

Characteristics	
Quality level for consumers	★★★★
Basis	PTFE
Number of layers	3
Coating thickness µm [mils]	30 - 40 [1.18 - 1.57]
Curing temperature °C [°F]	420 [788]
Service temperature °C [°F]	250 [482]
Color variety	various color options feasible

Performance profile	
Scratch resistance	★★★★★
Abrasion (BS)	★★★★★
Non-stick (LGA)	★★★★
Non-stick (LGA & milk)	★
Corrosion resistance	★★★★★

Substrate	
Pressed / forged alu	✓✓
Cast alu	✓✓
Stainless steel	✓✓

DURIT® Select Pro is a ceramic reinforced three-layer non-stick system for every day use. It is suitable for all foodstuffs and demands. Good durability and very good non-stick properties make this product unique.

- ① Very robust top coat for a long-lasting non-stick effect and excellent cleanability
- ② Ceramic reinforced mid coat for high wear resistance and optimum bonding of all layers
- ③ Primer with very good adhesion to the substrate
- ④ Specially prepared substrate for an optimum adhesion of the coating to the cookware product

ENTRY LEVEL COATINGS

ILAG coatings applied in the right way can be used for food contact materials according to the European legislation.
