

XERADUR® 2

Best ceramic coatings*

- One or two coat non-stick system based on xerogel with excellent results in the chicken wing and egg test. Constant performance even with tomato and pork test
- Due to the significant improvement of the formulation, XERADUR® 2 does not show any cracks during rapid temperature changes
- Very good abrasion and corrosion resistance
- Constant non-stick effect even after heavy heat exposure

*acc. ILAG test method

Never before has a ceramic coating shown a better performance

With the advancement to the next generation of ILAG CERAMIC® we were able to eliminate many typical weak spots of ceramic coatings.

XERADUR® 2 has been able to prove its outstanding properties in numerous tests, e.g. in the chicken wing test*:

*Chicken wings marinated in soya sauce are being fried for 5 minutes on each side (10 minutes in total) at 220-250 ° C. Subsequently, the pan is rinsed by hand. This test procedure will be repeated 20 times.
