

# BAKEWARE

Natural ingredients

## SUSTAINABLE AND SIMPLE – adding natural ingredients to bakeware coil products

### Product features:

- Carnauba wax and biopolymers can be added to the wet coating
- Only feasible as low-cure system
- Max. 180 °C use temperature possible / only suitable for sweet baking
- A lot of colors are feasible
- 2-coat system with good abrasion resistance

# BAKEWARE

## Natural ingredients

### Ingredient options

- Carnauba wax – obtained from the leaves of the Copernicia prunifera palm; stands for good slip values
- Biopolymer – obtained from the exterior skin of grain; stands for great robustness

Ingredients are detectable also after use of the baking tin. This provides a reliable storyline for marketing.

Ceramic reinforced 2-coat system delivers basic product performance and good abrasion resistance

### Good to know

Only suitable for sweet baking. Maximum use temperature is 180 °C.
